SUBJECT INDEX

Actinomycetes—
 in manure composts, 94
 in soils, 37
 thermophilic, 48
 Alfalfa, mineral requirements, of, 459-466
 Alkali soils, a discussion in relation to base exchange, 367
 Alkalization of soil affecting electrodialysis, 479
 Aluminum sulfate, effect on muck soils, 431
 Ammonia—
 accumulation in muck soils, 428
 exchangeable, effect on liberation of phosphate, 360
 for plants, 277
 nitrogen in boron deficient plants, 35
 Aniline in exchange reactions, 5, 7
 Anion displacement, 123
 Azotobacter, a new species, 329-338
 Bacteria—
 cowpea group of root-nodule, 63
 in manure composts, 94
 in soils, 41, 441
 numbers as affected by dispersion, 442
Rhizoclonia solani, a bacterium antagonistic to, 207-214
 root-nodule—
 of tropical legumes, 63-76
 studies, 293
 Barium chloride, effect on muck soils, 431
 Base—
 content of corn plants, 273-283
 exchange—
 a discussion, 367
 capacity as affected by fertilizers, 21
 in soils, methods, 245-253
 recovery upon electrodialysis, 483
 Beidellite—
 distribution in soil horizons, 181
 montmorillonite-nontronite type of clay minerals, 1
 Books, *see* Book reviews at end of letter B.
 Boron—
 deficiency, 33
 effect on muck soils, 431
 Brucine in exchange reactions, 5

BOOK REVIEWS

Algae, 169
 Chemistry of the Amino Acids and Proteins, 168
 Collings, G. H. Commercial Fertilizers. Second edition, 168
 Ferns of the Southeastern States, 165
 Fertilizers, Commercial, 168
 Genetics, 171
 Humus, 255
 Jasny, N. Research Methods on Farm Use of Tractors, 164
 Kubišna, W. L. Micropedology, 163
 Micropedology, 163
 Ogg, W. G. (editor) Macaulay Institute for Soil Research. Collected Papers, v. 1, 166
 Rothamsted Experimental Station Report for 1937, 167
 Schmidt, C. L. A. Chemistry of the Amino Acids and Proteins, 168
 de'Sigmond, A. A. J. Principles of Soil Science, 170
 Small, J. K. Ferns of the Southeastern States, 165
 Snedecor, G. W. Statistical Methods. Second edition, 163
 Soil, Humus, 255
 Soil, Micropedology, 163
 Soil Research, Collected Papers, Macaulay Institute for, 166
 Soil Science, Principles of, 170
 Statistical Methods, 163
 Tiffany, L. H. Algae. The Grass of Many Waters, 169
 Tractors, Research Methods on Farm Use of, 164
 Waksman, S. A. Humus—Origin, Chemical Composition, and Importance in Nature. Second edition, 255
 Walter, H. E. Genetics. An Introduction to the Study of Heredity. Fourth edition, 171

Calcium—
 exchangeable, effect on phosphate liberation, 360
 in alfalfa, 462
 saturated soil, availability of phosphate in, 359
 weeds rich in, 232
 Capillary tension as a measure of pore space, 347
 Carbohydrate metabolism, 157
 Carbon dioxide—
 effect on release of elements, 457
 from mucks, 439

- Cation—*see also* Base
 exchange mechanism, 1-13
 exchangeable, effect on phosphate availability, 357
 interchange between roots and soil colloids, 237-272
 preparation of soil for, study, 357
- Chloropiricin, control of nut grass with, 391
- Clay—
 liberation of nutrients from, 457
 minerals, cation exchange in the montmorillonite-beidellite-nontronite, 1
- Colloids—
 cation interchange between plant roots and, 257
 dehydration, 179
 molecular ratios in, 177
 optical properties, 183
 plant growth and breakdown of inorganic soil, 455-458
 profile study of soil, 175
 X-ray analyses, 185
- Composts, actinomycetes and fungi in, 37
- Copper sulfate, effect on muck, 429
- Corn, base content, 273
- Cotton seedlings, effect of boron deficiency, 33
- Crops—
 phosphorus in, 134
 silica in, 134
- Electrodialysis of soils, 479
- Fertilizer—
 effect on exchange capacity, 21
 residues, distribution in the soil, 15-26
- Forests—
 burned and unburned, 318
 pine, moisture in, 313
- Fungi—
 in manure composts, 94
 in soils, 37, 441
- Gelatin in exchange reactions, 6
- Halloysite type of colloid, 190
- Heat of wetting of soils, 385, 415
- Hydrocyanic acid, methods of determining, 409-413
- Hydrogen-ion concentration (pH)—
 effect on electrodialysis of soils, 479
 influence on base content of corn plants, 273
 ultimate, as affected by fertilizers, 21
- Iodide, tributyl mono-heptyl ammonium, in exchange reactions, 5
- Irrigation water problem, 448
- Kaolinite type of colloids, 190
- Lime—
 comparison with silicates of calcium and magnesium, 131
 effect on muck soils, 434
- Lipman, Jacob Goodale, obituary note, facing 346
- Magdala red in exchange reactions, 6
- Magnesium—
 exchangeable, effect on phosphate liberation, 360
 in alfalfa, 462
- Manganese sulfate, effect on muck soils, 430
- Manure—
 effect on phosphorus distribution in soils, 19
 horse—
 composition, 87
 microbes in, 43
 infusion, effect on muck soils, 435
 stable, decomposition, 47, 83
- Medicago sativa*, ability to fix nitrogen, 301
- Methylene blue in exchange reactions, 4
- Microbiological process in muck soils, 425
- Microorganisms—*see also* Bacteria, Fungi, Actinomycetes
 temperature, effect on, in stable manure composts, 83-98
 thermophilic decomposition of plant residues by, 217-224
- Minerals—
 for alfalfa, 459
 metabolism by tomatoes, 143
- Moisture—
 contents, temperature changes in soils affecting, 467, 473
 field capacity, measure, 350
 in pine forests, 313
- Montmorillonite—
 beidellite-nontronite type of clay minerals, 1
 distribution in soil horizons, 181
- Muck soils, microbiological activities in, 425
- β -Naphthylamine in exchange reactions, 5, 7, 8
- Nitrate—
 accumulation in muck soils, 428
 and ammonia for plants, 277
 nitrogen for plants, 274
 phenoldisulfonic acid method of determining, 397
- Nitrification—
 phosphate effect on, 115
 studies, 437

- Nitrogen—
 - changes in horse manure, 91
 - fixing power of soils, 201
 - Medicago sativa*, ability to fix, 301
 - metabolism by tomatoes, 143, 154
 - nitrate in boron deficient plants, 35
 - removal by alfalfa, 463
 - requirements of alfalfa, 459
 - sunlight as a factor in, transformation in soil, 285
 - supply, effect on base content of corn, 273
 - weeds rich in, 232
- Nontronite-beidellite-montmorillonite type of clay minerals, 1
- Nut grass, control with chloropicrin, 391
- Nutrients, adsorption by weeds, 227
- Orchard subsoils, pore space in, 347
- Organic matter—
 - effect on—
 - actinomycetes, 42
 - water holding capacity of soils, 377-383
 - in arid soils, 27
- Phosphate—
 - availability, 357
 - displacement, 127
- Phosphorus—
 - available, and soil treatment, 465
 - distribution in soil, 16, 18
 - effect on nitrifying capacity of soils, 115-121
 - in alfalfa, 461
 - in sudan grass, 134
- Potassium—
 - deficiency symptoms, 152
 - exchangeable, effect on phosphate liberation, 360
 - fixation, 24
 - in alfalfa, 461
 - role in plants, 143-161
 - weeds rich in, 232
- Pyridine in exchange reactions, 4
- Roots, contact between, and soils, 259
- Rossi, Giacomo, obituary note, 173
- Saline water, effect on loess soils, 447
- Selenium, availability to crops, 305-311
- Shorey, Edmund Cecil, obituary note, 344
- Silica—
 - in sudan grass, 134
 - sesquioxide ratio in soil colloids, 177
- Silicates—
 - adsorption, 129
 - effect on plant yields, 123-140
- Sodium—
 - chloride, effect on muck soils, 429
 - exchangeable, effect on phosphate liberation, 360
 - nitrate, effect on movement of phosphorus, 19, 23
 - sulfate, effect on muck soils, 431
- Soil—
 - capillary tension, as a measure of pore space, 347
 - colloids, *see* Colloids
 - desert, temperature, 195-199
 - fertility plots, 15
 - fertilizer residues in, 15
 - horizons, colloids in, 181
 - moisture determination, 473
 - nitrogen fixing power, 201-206
 - nitrogen transformation by sunlight, 285-291
 - phosphate availability in, 357-366, 465
 - pore space, 347
 - profile, colloids in, 175-193
 - samples, preservation, 353
 - selenium in, 305
 - series, analyses, descriptions, or experiments with—
 - Bell, 116; Cecil, 175; Cisne, 2; Colts Neck, 123, 129; Crockett, 116, 117; Duval, 116; Falls, 117; Hartsburg, 2; Houston, 116, 117; Leaf, 116; Lufkin, 116; Miles, 116, 117; Norfolk, 117; Pryor, 116; Putnam, 2; Quanah, 116; Refugio, 117; Ruston, 116; Sumter, 116, 117; Susquehanna, 117, 175; Tabor, 116; Vernon, 117; Victoria, 117; Webb, 116; Wilson, 116
 - surface—force curve, as affected by moisture, 473
- Soils—
 - actinomycetes, 37
 - alkali, a discussion of, in relation to base exchange, 367
 - base exchange, *see* Base exchange
 - calcium-saturated, 359
 - contact between, and roots, 259
 - electrodialysis, 479-485
 - fungi, 37
 - heat of wetting, 385-390
 - hydrogen-saturated, 359
 - loess, of the Mediterranean, 447-453
 - mechanical analyses, 77
 - moisture relationships in forests, 313-324

Soils—(*continued*)

- muck, microbiological activities in, 425
- nitrifying capacity, 115, 357
- organic matter in arid, 27-31
- Palestine, analyses, 450
- phosphates in, 115
- physical characteristics, 77-81, 415-423, 449
- sub—
 - desert, temperatures, 195
 - pore space in, 347
 - temperature changes in, 467
 - wilting point, 377

Sulfur, effect on muck soils, 431

Temperature, effect on—

- electrodialysis, 479

Temperature, effect on—(*continued*)

- microbial population, 83
- moisture in soil, 467, 473

Tomatoes, metabolism, 143

Water—

- analyses, 448
- saline, effect on loess soils, 447

Weeds—

- adsorption of nutrients by, 227-235
- zinc content, 237

Wilting point of mineral soils, 377

X-ray analyses of soil colloids, 185

Zinc—

- content of weeds and other plants, 237-243
- sulfate, effect on muck soils, 431
